

2018-2019 Flu Season

We look forward to providing flu protection for your employees and their families during the 2018-2019 flu season.

Attached you will find:

- 2018-2019 Influenza Immunization Consent Form
- Influenza Vaccine Information Sheet (VIS)
- Drop in clinic INFORMATION

Cascade Health will be providing the intramuscular version of the Influenza vaccine this season, which can be given to persons 10 years of age and older.

To aid in the flow of the clinic and return your employees back to work in a timely manner we recommend:

- Large groups: it is helpful to stagger the flow by assigning timeframes or by alphabet.
- Completion of the consent prior to the clinic or presenting for the vaccine.
- **For insurance Billing:** Please have employees **bring a copy** of their insurance card, which we will attach to the consent form. We will bill the following insurances: **Pacific Source, MODA, Regence BC/BS, or Providence**. If the employer is covering the cost of this vaccine, the employers name should be on the consent. In the event that the vaccine is self-pay, Cascade will accept checks in the amount of **\$32** or the exact change. We are not able to bill Medicare or Medicare Supplements. Since Medicare covers flu vaccines, in order for Cascade to provide the vaccine an individual would need to self-pay and sign a waiver stating they will not bill Medicare.
- ***If payment is denied by the insurance, the vaccine fee will then be the responsibility of either the employer or employee. Please designate responsible party on the consent form.***

Our set up needs include:

- An area for registration
- Table and two chairs for each person doing the vaccinations. Those receiving the injection always appreciate an area that provides some degree of privacy.
- Small garbage can per person providing vaccinations.

Often our staff will be traveling from one clinic to another and we will attempt to adhere as close as possible to our scheduled clinic times. We appreciate your understanding if we are delayed by a previous clinic. If possible, the staff will arrive prior to the clinic to set up.

Please advise us prior to the clinic:

- Entrance and contact person
- Parking situation

If you have any questions, please feel free to give me a call.

Adrienne Royer, RN (541) 228-3096
