Water Bottle Refilling Stations 2018

Water stations are delivered, set up, and picked up from local events via a contracted event service provider. Water refilling stations reduce waste associated with single use bottled water at events, and provide attendees with free access to clean local drinking water .

27

Number of local events that used water stations

687

Gallons of water used by water refilling stations

5203

Single use plastic water bottles replaced with sustainable options

3
