

# Community Health and Social Services Large Lever Shareholder Meeting

## Round 2

December 5, 2018

Room 258, Lane County Public Health Building

1 PM – 3 PM

**In Attendance:** Susie Cousar, Lane Community College; Luiz Maggiori, Lane Community College; Brian Johnson, Lane County; Susan Blaine, Peace Health; Kevin Holman, City of Eugene; Stephanie Jennings, City of Eugene

**Climate Action Plan 2.0 Project Team:** Mark Nystrom, City of Eugene; Joshua Proudfoot, Good Company

### Welcome, Introductions

Mark Nystrom called the meeting to order and made opening remarks about the agenda and the program overall.

Mark provided background information about the CAP2.0 Plan. Please see the PowerPoint Presentation that is available on the CAP2.0 Webpage for more details on this project.

Then introductions were made.

### Mitigation Analysis: Process, Results, and Questions

Josh Proudfoot, Good Company, presented the Mitigation Analysis Draft Results. To get more details on these results, please see the following documents available on the CAP2.0 Webpage. It was later noted that there was some “version control” and that an updated Mitigation Analysis Draft Report would be available. The updated version is the one currently (November 2018) available on the webpage.

1. The LLS Round 2 PowerPoint Presentation
2. The Eugene Community Climate Action Plan 2.0 Draft Mitigation Results

It was asked whether fossil fuel is a subset of the consumption based Inventory and indeed it is both part of the sector based and consumption based inventories.

A participant noted that there was a conversion factor in the memo that translated the amount of trees necessary to mitigate the community’s fossil fuel use and asked if it is possible to convert from ghgs to trees. Josh Proudfoot said it was.

There was also a discussion about net-zero future housing vs existing housing stock. None of the plans that were analyzed said much about retrofitting older homes. It was noted that this is definitely an area that needs attention.

It was also asked if the plans and strategies were run through a triple bottom line (TBL) analysis and the City has committed to doing so.

Finally there was a statement about devoting more land for urban forestry.

## Chapter Specific Data, Q&A

Josh provided an overview of the specific Community Health and Social Services HIPs and TBLs. Please refer to the Community Health and Social Services PowerPoint for more information.

Mark asked the LLS members to review the LLS Actions and report any inaccuracies in the report.

## Equity Panel and Public Outreach

Mark asked what kinds of questions LLS members would like to ask the Equity Panel and during the City's outreach.

Some of the comments and questions included:

- Where do you seek refuge from smoke? Especially those who work outside.
- The City should look to the Community Health Improvement Plan that was coordinated by Peace Health. (Livehealthylane.org)
- Ask the Equity Panel “What do you need to \_\_\_\_\_?” and “What are the barriers to \_\_\_\_\_?” For example, “What do you need to ride the bus more? What are the barriers to ride the bus more?”
- Depression due to climate change is the top concern of mental health experts. How do we grow the resilience of people who become aware of the challenge of climate change? How do you not become depressed?
- Where is the hope? How do you make yourself happy? Reduce work/consumption and spend more time with family and friends was one suggestion.
- Affordable food? Will food that is healthy be available?
- Empower people to take action.
- Ask the Equity Panel about the TBL document. What in it is about meeting basic needs?
- How do people stay warm in the winter and cool in the summer? What is your refuge from heat?
- How do people feel about a vector control district?

## Closing Thoughts

Mark asked for any closing thoughts or questions. Everyone agreed that the previous discussion was excellent and that they had nothing more to say.

## Meeting Adjourned
