# OVERVIEW

This guide has been developed to help customers estimate their building permit and Systems Development Charge (SDC) fees for commercial construction projects. The City of Eugene does not provide fee estimating services for specific projects. Please keep in mind that costs could differ due to the number of variables used to calculate costs. Questions regarding the guidelines or methodology in estimating fees may be directed to:

Permit and Information Center  
99 West 10th Avenue  
Eugene, Oregon 97401  
(541) 682-5086

To calculate an estimate of your building permit fees, you will need some information about your project.

- Occupancy classification (use of the building)
- Construction type
- New square footage

These factors will be used to determine the valuation of your project. For new construction the ICC (International Code Council) square footage construction costs will be used to determine the valuation for your project. If the stated value of the project is higher than the calculated value, all fees will be based on the stated value. Building permit, plan check fees, and if applicable the Affordable Housing Construction Excise Tax are based on the valuation.

Interior remodels and tenant infills are based on the fair market value of all construction work for which the permit is issued.

Some fees may be assessed in addition to your permit and plan check fees. This guide also is not intended to be a comprehensive list of all possible fees. Please refer to the fee schedule for additional information.

## **Administrative User Fee – City of Eugene**

All fees are subject to the City of Eugene Administrative User Fee. The current fee is 9 percent of fee type totals. The fee is added to the total of all fees (except SDC charges and State surcharge and training fees)

## **Surcharge Fee - State of Oregon**

The City of Eugene is charged with administering the State structural, electrical, plumbing and mechanical codes. A surcharge on these permit fees and the City Administrative Fee is levied by the State of Oregon and collected by the City of Eugene for forwarding to the State Building Codes Division (BCD) in Salem. The charge is used by BCD to defray administration costs, state inspection costs, training, and educational programs. The current surcharge fee is 12 percent, subject to change by BCD.

## Building Permit Fees

When submitting your construction application you will be asked to pay the structural plan review fee plus applicable administrative fee as a deposit for the plan review. The structural plan review will be based on the valuation you provide to us at application. For new construction, the valuation of your project will be calculated during the plan review process utilizing a square footage cost based on the ICC Valuation Table. The valuation table is updated during April of each year.

## Electrical Permit Fees

---

A 35% plan review fee is assessed with installations involving one or more of the following:

- Fire pump
- Emergency system
- Addition of new motor load of 100HP or more
- Patient area health care facility
- Hazardous locations
- Recreational vehicle parks
- Marinas and boatyards
- Floating buildings
- Six or more residential units
- Supply over 600 volts nominal
- Building over three stories
- Commercial use agricultural buildings
- Installation of 150 KVA or larger separately derived system
- "A", "E", "I-2", "I-3" occupancies
- Service or feeder 400 amps or more where the available fault current exceeds 10,000 amps at 150 volts or less to ground, or exceeds 14,000 amps for all the other installations

Minimum Electrical permit fee is \$94.25.

# **Commercial Mechanical Permit Fees**

---

Commercial, Industrial, and Multi-family fees for mechanical equipment are based on the total value of mechanical construction work. This valuation must be listed separately from all other project costs at the time of submittal.

Minimum permit fee is \$94.25.

## **Plumbing Permit Fees**

---

A 35% plan review fee is assessed with installations involving one or more of the following:

- Installation or alteration of medical gas and vacuum systems for health care facilities
- Installation or alteration of chemical drainage waste and venting systems containing chemical agents potentially detrimental to the plumbing system
- Installation or alteration of wastewater pretreatment systems for building sewers
- Installation of vacuum drainage waste and venting
- Installation or alteration of reclaimed wastewater systems
- Installation of commercial booster pump system needed to maintain a minimum residual water
- Installation of a plumbing system building water service line with an interior diameter or nominal pipe size of 2" or greater except 2" line systems designed and stamped by a licensed engineer
- Installation of any multi-purpose fire sprinkler system under standards adopted by the department
- Grease processing equipment (traps, interceptors)
- Voluntarily requested

For commercial and multi-family units, the fees are based on the number of fixtures.

Minimum Plumbing permit fee is \$94.25.

## Other Permit Fees

---

There may be other fees that will apply to your construction project that you should be aware of.

Additional Plan Review Fee	\$ 104.50/hr
<i>Most projects require additional submittals before the application can be approved. Additional plan review will be assessed on a per hour basis by each reviewer.</i>	
Alternate Materials and Methods	\$ 104.50/hr (Minimum charge \$52.25)
Zoning Inspection Fee	\$104.50
Emergency Egress Lighting Inspection (after hours inspection minimum 2 hour charge)	\$209.00

The 9% city administrative fee applies to all fees listed above.  
 State Surcharge (12%) only applies to the Emergency Egress Lighting inspection.

### Erosion Prevention

Erosion prevention fees are charged to all projects that will impact the soil on the construction site, such as new buildings and additions that will increase the footprint of the existing structure. Erosion prevention permits are issued as a separate permit. The non-permitted site fee is charged for projects that do not require a separate erosion prevention permit.

Erosion Permit Fees	Fee	Amount

## Signs

A sign permit will be required for *each* sign on your development site. Each sign will be assessed a plan check and permit fee dependent upon the size of the sign.

Signs permits may also require an electrical and building permit.

If you have questions regarding sign permit fees, contact Land Use staff at 541-682.8336.

* Transportation, local/regional wastewater, and parks SDC rate tables are available at <a href="http://www.eugene-or.gov/SDC">www.eugene-or.gov/SDC</a> .				
** The impervious surface area includes any hard surface area which causes water to run off the surface in greater quantities or at an increased rate of flow from conditions pre-existing to development. Common impervious surfaces include, but are not limited to, rooftops, walkways, driveways, parking lots, or concrete or asphalt surfaces. 1 & 2 family stormwater categories are based on the size of building footprint which is defined as the first floor area plus attached or detached garage or carport. The stormwater SDC for a duplex is calculated as two times the appropriate stormwater SDC flat rate of either a Small or Medium residential category. Duplex units equal to or over 3,000 sq ft each are treated as Large residential. LID component reflects capital costs to provide off-site treatment of stormwater runoff.				

Note that SDC fees paid are not refundable (or, in the case of an existing SDC agreement to pay SDCs in installments, the agreement terms may not be adjusted), regardless of method of payment except when partially refunded for cancellation or expiration of an active permit, or a change of design is approved for an active permit that results in a less intense use of the property.

*The unit cost of capacity for the local wastewater system is \$3.50 per gallon per day.			
The flow per Plumbing Fixture Unit (PFU) is stated as gallons per day based on the size of development and type of land use.			
Land use types that do not fit into the above categories will receive a default flow assignment based on the sample average.			
The default flow is 47.93 gal/day x \$3.50 = a cost per PFU of \$167.76.			

A rate per PFU may be assigned by the City Engineer should a proposed use not be represented by one of the published SDC use codes and for which a default flow assignment is not representative of the proposed flow. In the case of those proposed developments that are determined to have a potential for exceptional water usage, the City Engineer may require that the Owner(s) enter into an agreement with the City to review water usage or wastewater discharge at such time the development is in full use or production as the final basis of the local wastewater SDC. A complete list of wastewater SDC/HUD BPR use codes is provided in Table 8.

### *Summary of Nonresidential SDC Classes*

Class	Development Types*
A	Hotels, motels, B&Bs, & other tourist accommodations
B	Office (financial, investment, real estate, government, medical, legal & other business/professional services), institutional, grocery, eating & drinking establishments
C	Industrial, wholesale, manufacturing, transportation, agriculture, Mixed Use Development with multiple classifications (i.e., retail & restaurant)
D	General retail & services, recreation
E	Commercial warehousing & storage

Note that, on the basis of the park user survey results, K-12 schools are not included in nonresidential classes as users associated with such schools are generally attributable to local residential land uses and related demand is accounted for in residential development categories. \* See Appendix A for detailed cross-reference to HUD/BPR codes.

Fee estimates for proposed development are not provided by the City. Actual SDCs are determined and calculated only at the time of permit review by City staff based on the specific and detailed development plans and information submitted with the building permit application. Prior to permit application and review, City staff may provide forms and example calculations for the purpose of assisting customers in developing the customer's own preliminary and general estimate; however, such assistance does not constitute an estimate or commitment by the City as to the amount of SDCs to be charged for a particular proposed development.
