Urban Reserves Planning
Study Area Open Houses

January 9, 14 & 22, 2020

www.eugene-or.gov/urbanreserves
Meeting Outline:

1. Welcome/Introductions/Thank you!
2. Presentation
3. Q&A
4. Review materials /visit with staff/complete comment form
Urban Reserves

• Joint project—City and County

• Planning for the next two generations—as far out as 2062

• Areas identified for Eugene to grow into if/when needed

• Enough land for housing and jobs, as well as public lands for parks, schools and utilities/services

• Remains rural unless brought into the Eugene’s urban growth boundary through a formal process
What is the difference between Urban Reserves, the UGB, and City Limits?

https://youtu.be/P8JpPRoGhY0
Why now?

• Housing supply and affordability
• Direction from City Council and Board of Commissioners
• Coordinating with Growth Monitoring Program
• Planning for growth = better outcomes
MONITORING AND PLANNING FOR GROWTH

GROWTH MONITORING

- Collect Data
- Compare Assumptions to Actual Results
- Adjust Strategies if Needed
- Report Results

Every 5 years or if we are growing faster than anticipated:

UGB Analysis

- If enough land in UGB for growth
- If not enough land in UGB for growth

Efficiency Measures & Development Incentives

Urban Reserves

- Land to accommodate growth brought into UGB
- If still not enough land in UGB for growth

Future UGB
Collaborative Effort

• Community members
• Property owners
• Stakeholder groups
• Lane County
• Nearby Cities
• Utility and Service Providers
• TBL Sounding Board volunteers
• Technical Advisory Committee
Envision Eugene Technical Advisory Committee

- 13 volunteer members
- Advises staff on City-wide growth management initiatives
- Reviews technical information used to inform policy decisions
- Appointed by City manager
- Have met 13 times!
Service Provider Working Group

• Includes wastewater, water, parks, transportation, stormwater and fire protection
• Inside and outside UGB
• Evaluates service provision – key to informing decision
• Develops intergovernmental agreements (IGAs)
How many people are we planning for?

- 1,900 acres for 10 years (2042) with 16,000 new Eugenians*
- 4,000 acres for 20 years (2052) with 32,000 new Eugenians*
- 6,300 acres for 30 years (2062) with 49,000 new Eugenians*

*Population change since 2032
Initial Urban Reserves Study Area

- Includes land at least one mile from UGB, except at river and I-5
- Consistent with new state guidelines to streamline UGB analysis in future
- Almost 26,000 acres
Updated Urban Reserves Study Area

- After analysis, not enough developable land for a 30-year Urban Reserve option
- Based on capacity assumptions, we needed almost 1,200 acres of additional land suitable for urban reserves
- Study area expanded west, around Highway 126 and Fisher Rd
Land Supply

Identify “developable land” by removing protected, committed and fully developed land.

- **Protected** land is land reserved to protect natural resources or prevent the impact of natural hazards, and therefore is assigned *no development capacity*.

- **Committed** land includes public and other land that has no development potential for housing or jobs because they are committed to other uses.
Protected land in Urban Reserves Study Area:

- Lane County Goal 5 adopted **riparian corridors**
- Lane County Goal 5 adopted **wetlands**, including West Eugene Wetlands
- **Critical habitat** (federal and state-listed threatened and endangered species)
- **Historic and cultural resources**
- **Natural Resource** plan designations
- Floodway and **100-year flood plain** (FEMA)
- Prohibitively **steep slopes** (>30%)
- High risk **landslide areas** (DOGAMI)
Committed land in Urban Reserves Study Area:

- Public Parks and Open Spaces
- School District Property
- Utility Property
- Airport Property
- Other Government Property
- Cemeteries
- Transportation Rights-of-Way
- Bonneville Power Administration Rights-of-Way
- Private property with conservation easements that prohibit urban development
Land Supply

No development potential on Protected, Committed and fully Developed land

This is over half of the land in the study area
How many homes or jobs can potentially be accommodated on the developable land?

Residential:

Used average densities from inside the UGB based on factors such as:

- Slope
- Elevation
- Size

Estimates **on average** the total amount of capacity available.
Land Suitable for Urban Reserves

Evaluate developable land in the study area by considering it in terms of the following factors, then dismiss land that, on balance, would be unsuitable for urban reserves:

1. **Efficient** accommodation of land needs
2. Orderly and economic provision of public facilities and services
3. Comparative **environmental, energy, economic and social consequences**
4. **Compatibility** with nearby agricultural and forest activities

Locational criteria from State Planning Goal 14, Urbanization
Version 1

- Analyzed 18 subareas

- Removed **over half** of the developable land as unsuitable for urban reserves

- 5,400 acres of land remained; not enough for a 30-year Urban Reserve option
Removed from further consideration:

- Airport subarea
- Beacon/River Loop (mostly floodplain)
- Most of Airport South, McKenzie, and Game Farm subareas (mostly floodplain)
- All of S. Willamette/Fox Hollow and Dillard subareas (steep slopes, elevation, landslide and fire hazards, access, difficulty to serve)
- More distant areas due to inaccessibility, difficulty to serve, hazards such as steep slopes, landslide risk, etc.
Study area expansion

Reviewed all land around study area

Fisher Rd area stood out

Connected to other suitable land, with key transportation corridors

EETAC reviewed suitability analysis and provided input

In early December, sent postcards to 132 households
Revised Results

Added approximately 900 acres of suitable land in the new Fisher Rd subarea

And approximately 350 acres of suitable land elsewhere within the existing study area

6,700 acres of suitable land (approx.)

... this is (approx.) 400 more acres than needed for 30 year Urban Reserve
Next Steps

- Input from the public!
- Make any refinements necessary
- Develop options for decision-makers

Order in which we have to consider land for potential urban reserves:

**First**, rural residential, commercial, or industrial land -- not set aside for farming or forestry (i.e. exception areas)

**Second**, land that only has marginal value for farming or forestry (i.e., marginal lands)

**Third**, Farm and Forest Lands (poorest soils first)

Action on proposed Urban Reserves in early Spring
